JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

President, his subject being "Standardization of Nursery Inspection Rules and Requirements".

Notice of the proposed amendment to Article III of the Constitution of the Society having been given at the last previous meeting the proposed amendment was presented to be voted upon. The amendment was adopted and read as follows:

"The officers shall consist of a President, a Vice-President, a Secretary and a Treasurer. There shall be an executive committee consisting of the President, Secretary and one other member. The officers shall be elected at the annual meeting in January."

Under the head of new business, Dr. Montgomery presented for consideration of the Society a proposition to change the name of the official organ of the Society. There was considerable discussion which was participated in by practically all members present, and after considering various suggestions decision was finally arrived at that the name of the publication be changed from THE FLORIDA BUGGIST to THE FLORIDA ENTOMOLOGIST, this upon motion of Mr. O'Byrne, seconded by Dr. Montgomery.

Under Timely Notes Mr. Watson, Entomologist Florida Experiment Station, displayed specimens of a spider, the "black widow", *Latrodæctus mactans*. This is said to be the most poisonous of the spider family known in Florida.

Mr. Goodwin reported a newspaper item indicating that the pink bollworm had found lodgment in Louisiana near the Texas line.

Dr. Berger made further report on production of Cuban Aschersonia, *Aschersonia cubensis*, and two or three other fungi (names not known). Dr. Berger reported that the growth of these cultures was very much slower than the yellow and red aschersonias.—J. H. Montgomery, Secretary.

OUCH!

On the first page of Bulletin 87 of the Arizona Agricultural Experiment Station occurs the following remark: "Many farmers now located in Arizona have had experience with it (the boll weevil) in Texas, Oklahoma and other states of the *so called cotton belt*" (*italics mine*).
